

In the Claims:

Please amend claims 1-6 and add new claims 7-12 as follows:

1. **(currently amended)** Use A method for the treatment of inflammation which comprises administering to a patient in need of such treatment an effective amount of a compound of formula (I)

in which:

A represents a phenyl group optionally substituted by one, two or three substituents chosen from a halogen or a C₁₋₆ alkyl or C₁₋₆ alkoxy group; a thienyl, furyl or pyridyl or a cycloalkyl having from 3 to 8 carbon atoms;

B represents ~~[a cyclic]~~ an aminobicyclic group which consists of a 5- or 6-membered cyclic amino compound condensed with a 5- or 6-membered cycloalkyl ring which can have one or two unsaturated bonds, with the condition that B is bonded to the carbon atom of the carbonyl group on the nitrogen atom; each R represents a hydrogen atom or the R residues are combined together to form a chemical bond; R₁ represents a hydrogen atom, a C₁₋₆ alkyl group or an aralkyl group having from 7 to 10 carbon atoms; where there are geometrical isomers, each geometrical isomer, its E isomers and its Z isomers, its cis isomers and its trans isomers; optionally in the form of an enantiomer or diastereoisomer or of a mixture of these various forms, including of a racemic mixture, and the addition salts with pharmaceutically acceptable acids of one of these forms;
~~in the manufacture of a medicament intended for the treatment of inflammation.~~

2. **(currently amended)** Use A method according to Claim 1, ~~characterized in that~~ wherein the compound of formula (I) is the compound:

in which:

B represents ~~the~~ an aminobicyclic group which consists of a 5- or 6-membered cyclic amino compound condensed with a 5- or 6-membered cycloalkyl ring which can have one or two unsaturated bonds, with the condition that B is bonded to the carbon atom of the carbonyl group on the nitrogen atom; each R represents a hydrogen atom or the R residues are combined together to form a chemical bond; R₁ represents a hydrogen atom, a C₁₋₆ alkyl group or an aralkyl group having from 7 to 10 carbon atoms;

Y represents a hydrogen atom, a halogen or a C₁₋₆ alkyl or C₁₋₆ alkoxy group and n represents 1, 2 or 3.

3. **(currently amended)** Use A method according to Claim 1, ~~characterized in that~~ wherein the compound of formula (I) is the compound:

in which Z represents an ethylene group or a vinylene group.

4. **(currently amended)** Use A method according to Claim 1, ~~characterized in that~~ wherein the compound is (S)-2-benzyl-3-(cis-hexahydro-2-isoindolinyldicarbonyl)propionic acid.

5. **(currently amended)** Use A method according to Claim 1 ~~any one of Claims 1 to 4~~, characterized in that the medicament is intended for the symptomatic treatment of painful conditions of light to moderate intensity and/or feverish states.
6. **(currently amended)** Use A method according to ~~any one of Claims 1 to 4~~, characterized in that the medicament is intended Claim 1 for the treatment ~~[haeuna]~~ of diabetic neuropathies, polyarthritis, arthrosis, lumbago, traumatological pain and inflammation in the ENT field.
7. **(new)** A method according to Claim 2 for the symptomatic treatment of painful conditions of light to moderate intensity and/or feverish states.
8. **(new)** A method according to Claim 3 for the symptomatic treatment of painful conditions of light to moderate intensity and/or feverish states.
9. **(new)** A method according to Claim 4 for the symptomatic treatment of painful conditions of light to moderate intensity and/or feverish states.
10. **(new)** A method according to Claim 2 for the treatment of diabetic neuropathies, polyarthritis, arthrosis, lumbago, traumatological pain and inflammation in the ENT field.
11. **(new)** A method according to Claim 3 for the treatment of diabetic neuropathies, polyarthritis, arthrosis, lumbago, traumatological pain and inflammation in the ENT field.
12. **(new)** A method according to Claim 4 for the treatment of diabetic neuropathies, polyarthritis, arthrosis, lumbago, traumatological pain and inflammation in the ENT field.
